

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-6. (canceled)

7. (currently amended) A method of providing electronic mail notification to a calling communications device, comprising:

formulating a user specific retrieval profile designating a ~~message delivery format and~~ user specified pre-designated information for said calling communications device;

receiving a call together with call related information from a calling communications device calling a first phone number;

terminating said call from said calling communication device before answering;

associating an email with comprising a first second phone number~~[[,]]~~ ~~said email comprising said user specified pre-designated information associated with~~ said call related information ~~call related information relating of~~ said calling communications device, said second phone number being a different phone number than that specified by said call related information;

~~receiving a call from said calling communications device;~~

~~detecting a caller ID of said call from said calling communication device;~~

in response to detecting said call related information ~~caller ID~~, automatically fetching and providing transmitting said email comprising said second phone number to said calling communications device ~~to said calling communication device~~ according to said user specific retrieval profile~~[[,]]~~ and

in response to a second call to said second phone number, transmitting said user specified pre-designated information to said calling communication device

~~terminating said call to said first phone number from said calling communication device before answering.~~

8. (previously presented) The method of providing electronic mail notification to a calling communications device according to claim 7, further comprising:

obtaining a communications device identifier when said calling communications device dials said first phone number; and

using said communications device identifier to select an electronic mail message.

9-25. (canceled)

26. (currently amended) A method of retrieving information by a first calling device from a second device, comprising:

formulating and storing a user specific retrieval profile designating a ~~message delivery format and~~ user specified pre-designated information relating to a first calling communication device;

receiving a call together with call related information from a calling communications device calling a first phone number;

terminating said call from said calling communication device before answering;

~~receiving said call from said first calling device associated with said first telephone number intended for a second device associated with a second telephone number~~;

associating ~~said user specified pre-designated information~~ a data message with said call related information of call related information of said first calling communication device, said data message comprising a second phone number than that specified by said call related information;

in response to detecting said call related information caller ID at ~~said second device~~, automatically retrieving and ~~said user specified pre-designated information~~;

~~at said second device, terminating said call from said first calling device before answering; and~~

transmitting said data message comprising said second phone number ~~said retrieved user specified pre-designated information~~ to said first calling device according to said user specific retrieval profile; and

in response to a second call to said second phone number, transmitting said user specified pre-designated information to said calling communication device.

27. (currently amended) The method of retrieving information by a first device from a second device according to claim 26, further comprising:

converting[[,]] ~~if necessary~~[[,]] said retrieved user specified pre-designated information to a short message and transmitting said short message to said ~~first~~ calling communication device.

28. (currently amended) The method of retrieving information by a first device from a second device according to claim 26, further comprising:

determining said first telephone number from said call related information associated with said call to said a second telephone number by said ~~first~~ calling communication device.

29. (canceled)

30. (currently amended) A system for retrieving information by a first device from a second device, comprising:

means for formulating and storing a user specific retrieval profile designating ~~a message delivery format and~~ user specified pre-designated information relating to a first calling communication device;

means for receiving a call together with call related information from a calling communications device calling a first phone number;

means for terminating said call from said calling communication device before answering;

~~means for receiving a call from said first calling device associated with a first telephone number intended for at a second device associated with a second telephone number;~~

means for associating said ~~user specified pre-designated information~~ a data message with said call related information of call related information of said first calling communication device, said data message comprising a second phone number than that specified by said call related information;

~~means for associating with said second device for detecting a caller ID of said call from said first calling device;~~

~~means for automatically retrieving said user specified pre-designated information using said call related information in response to said call from said first calling device;~~

~~means for associating with said second device for terminating said call from the calling device before answering; and~~

means for automatically retrieving and transmitting said data message comprising said second phone number ~~said retrieved user specified pre-designated information~~ to said first calling device according to said user specific retrieval profile in response to detecting said call related information; and

means for transmitting said user specified pre-designated information to said calling communication device in response to a second call to said second phone number.

31. (currently amended) The system for retrieving information by a first device from a second device according to claim 30, further comprising:

means for converting said retrieved user specified pre-designated information to a short message and transmitting said short message to said first calling communication device.

32. (currently amended) The system for retrieving information by a first device from a second device according to claim 30, further comprising:

means for determining said first telephone number from said call related information associated with said call to said a second telephone number by said first calling communication device.

33. (canceled)
